

LEGACY[®] ARCTIC BATTERY

***Extreme Power
for Cold Storage
Battery Applications***

The Douglas™ Legacy® Arctic battery has been specially designed to answer the needs of the most demanding cold storage and freezer applications. The Legacy Arctic battery integrates the thick-plate Legacy High Performance battery with an exclusive Arctic Electrolyte solution. This solution combats capacity loss in cold conditions at the lower depth of discharge rates. Combine this with a newly designed Thermal Tray Insulator and the Legacy Arctic Battery will provide the most effective capacity and voltage for cold storage/freezer applications.

The Legacy Arctic battery can be matched with any charger programmed for the demands of cold-store applications.

LEGACY[®] ARCTIC BATTERY

LEGACY[®] ARCTIC BATTERY

LEGACY® ARCTIC BATTERY

The battery THERMAL TRAY INSULATOR reduces cold effect on cells and improves performance of outer cells that are most effected by cold applications.

Battery Performance Features:

Legacy® Arctic Battery

- Special Arctic Electrolyte solution
- Battery THERMAL TRAY INSULATOR reduces cold effect on cells and improves performance of outer cells that are most affected by cold applications
- Improved voltage, capacity and life

Five-Fold Plate Insulation System

- Vertical fiberglass strands; woven glass mat; compression mat; rigid, perforate PVC shell; and sleeved separator
- Assures dependable performance for many years under the toughest conditions

Flip-Top Vent Caps for Easy Watering

- Reduces electrolyte dripping onto cell covers
- Safe, easy, convenient operation
- Saves time and money
- Eliminates lost vent caps
- Water level indicator (basket) for more accurate filling procedures

Quick Connect Cables - Optional

- Makes cable replacement as simple as the turn of a bolt
- Reduces downtime
- Maintenance friendly

Douglas™ Battery Premium Tray Coating

- Trays protected with electrostatic baked-on epoxy to withstand corrosion and the coldest, roughest working conditions
- Reduces voltage tracking and shorts
- Saves maintenance on lift truck roller compartments
- Reduces rust caused by condensation formed in cold storage environments
