

LEGACY[®]

Fast Charge Battery

The proven Douglas[™] High Performance Battery design is enhanced for higher charge rates and increased daily ampere hour throughput demanded by opportunity charging applications. The Douglas Legacy[®] Fast Charge battery is designed to accept charge rates up to 25% of the battery's rated capacity.

- Improved straps made with a special tin alloy
- Douglas[™] High Performance positive plates
- Premium Douglas tray coating
- Optional single point watering system recommended

LEGACY[®] Fast Charge Battery

LEGACY[®] Fast Charge Battery

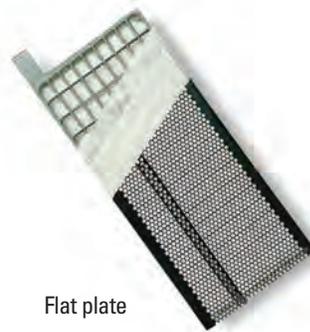

LEGACY® FAST CHARGE BATTERY

Douglas™ batteries are constructed to handle the increased demands of the fast charge applications with a more sturdy positive grid and five-fold wrap. Our sturdy construction allows the battery to run cooler, use less water and ensure long term life. These features, as well as our ability to properly spec out each application with the Douglas DataTrac™ allows us to monitor energy input and output. Monitoring each application will allow us to properly size the battery for your specific needs.

High Performance Plate Design

- Long life through heavy, thick plates that resist corrosion
- Excellent conductivity, especially during peak demand, with more lead
- Solid, pore-free casting for extended life and durability
- Paste-lock design assures most reliable performance

Flat plate

Quick-connect Cables – Optional

- Make cable replacement as simple as turning a bolt
- Reduce downtime
- Environmentally friendly

Quick-connect cables

Premium Douglas™ Tray Coating

- Electrostatic, baked-on epoxy on tray withstands corrosion and the roughest working conditions
- Reduces voltage tracking and shorts
- Saves maintenance on lift truck roller compartments
